Subject: RE: Solid waste infrastructure report draft

Sure thing. As asked, I provided several paragraphs as a summary of our discussions, which I've included below. For additional materials, I submitted the attached meeting summaries which I consolidated into one document with resources and funding options identified in each focus area.

Rick, if you want to give part or all of the oral report at the infrastructure meeting, just let me know. Otherwise I was planning to generally talk about the core areas we focused on and the identified resources to address those needs. Call me if you want to discuss.

Greg

The solid waste subcommittee met twice via conference call to discuss regulatory challenges, funding and resources for the Dry Creek Landfill and transfer stations. We split the agenda into four (and somewhat overlapping) focus areas: funding for equipment/vehicles, funding and needs for the transfer stations, landfill replacement funding needs, and closure/remediation issues.

The group identified potential funding sources and resources, which include the VW settlement fund, obtaining used vehicles from federal agencies, USDA Rural Development grants and loans, and integrated planning grants from Business Oregon. EPA offered another critical resource by committing to conduct an on-site characterization to document existing conditions. This assessment could lay the groundwork for further remediation, which is known to include hazardous waste caused in part by illegal dumping over the years. The tribe and EPA are currently discussing legal issues around liability, and once resolved, EPA can begin the assessment quickly.

The priority in the short term is for EPA to conduct the assessment, and those findings will help inform longer-term remediation needs. A second priority is to better understand the funding sources that the subgroup has identified and determine which sources to target. This will require a larger discussion and possible commitment from the tribe in terms

of its own staffing, priorities and funding resources, at least in terms of providing local match dollars, grant application staffing, etc.

Subject: Solid waste infrastructure report draft

Hi Greg, can you provide us with a draft of the report that we are going to present at the 9/24/19 Warm Springs meeting?

Thanks.

Rick McMonagle
Tribal Solid Waste Liaison
SEE/EPA Region 10
Oregon Operations Office
